

"Our PREHEMPTIVE Sports CBD Cream is a 1933 treasured family recipe from Provence, France. It's used until today for body & skin trauma, arthritis, sunburn, muscle spasms, bug bites and inflammation".

We embrace nature and creation with the value of going back to the basics by using minimum processing during production. Always crafted fresh in small batches, our creams are made from ingredients that are 100% active, with no fillers and no preservatives, free of parabens, petroleum, or irritating chemicals.

EVIDENCE OF TRULY NATURAL

We try to keep our products as consistent as possible, but with natural ingredients comes the chance for natural variation. There can be variations in the color, texture, taste, and smell between each new batch. Crops are susceptible to weather and growing conditions. This is always true, while some people consider the uncertainty of natural ingredients to be a drawback, for others it is confirmation of their non-synthetic identity. Variations are your guarantee that the materials used are truly natural.

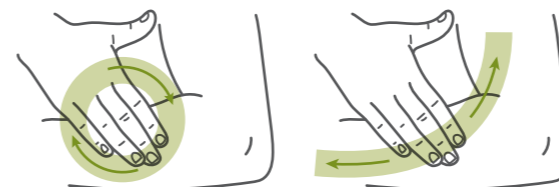

Suggested Use

Our exclusive brand of Sports CBD cream crafted with Shea Butter is solid at room temperature, yet melts at 87-90 degrees. When applied, it immediately blends into the skin's pores, (exactly what nature intended for body butter), which makes delivery to the targeted area more efficient, for a faster relief. A little oily at first, the cream absorbs quickly, leaving your skin soft and smooth. Made with full spectrum Cannabinoids infused in Shea, Arnica, Calendula, Ginger and Lavender or Sweet Orange and Lemon Verbena, Ginger and Lavender or Sweet Orange and Lemon Verbena. For people with essential oils allergies, we offer an option without E.O.

A pea sized amount will cover a large area of your body.

Apply a really thin coating to the affected part of body and gently massage until absorbed. For acute and chronic pain, use a second coating immediately after the first application.

How to massage: 45 sec minimum in a circular way or/and up and down the targeted area.

Note: It may stain your clothing or bed sheet if the cream was not absorbed properly.

Storage Guidelines

Store in cool temperatures, away from light and moisture. As our products are crafted without any preservatives, keep your jar away from the direct sunlight or any heat source. If product heats into liquid form, place the container in the refrigerator for a few hours and it will re-solidify upon cooling without the functionality being affected. Natural ingredients become inactive if the cream reached a boiling point. This cream has a shelf life of 12 months when stored properly.
